REACT.JS / FRONT-END DEVELOPER

PROFESSIONAL SUMMARY

Front-End Developer with **4+ years of experience** designing, developing, and maintaining scalable React.js applications for enterprise projects. Strong expertise in **React.js, JavaScript (ES6+), Redux, React Hooks, REST APIs, and responsive web development**. Experienced in building reusable component architectures, optimizing application performance, and delivering user-centric solutions in Agile environments. Hands-on experience leveraging AI-assisted development tools including **GitHub Copilot and Generative AI Tools** to improve productivity, accelerate debugging, support unit testing workflows, and enhance code quality.

TECHNICAL SKILLS

- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3
- **React Ecosystem:** Redux, Context API, React Hooks (useState, useEffect, useMemo, useCallback), Functional Components, React Router, React.lazy & Code Splitting, Component-Based Architecture
- **UI & Styling:** Bootstrap, Responsive Web Design, Cross-Browser Compatibility
- **Performance Optimization:** Lazy Loading, Memoization (React.memo, useMemo), Virtualization
- **API & Data Handling:** RESTful APIs, JSON, Async Data Handling
- **Testing & Debugging:** UI Debugging, Cross-Browser Testing (Sauce Labs, AppliTools), Basic Unit Testing Knowledge (Jest – Familiar).
- **Tools & Platforms:** Git, GitHub, VS Code, JIRA, Figma, Sauce Labs, AppliTools
- **Concepts:** Responsive Web Design, Cross-Browser Compatibility, Agile / Scrum, UI Debugging & Testing
- **AI-Assisted Development Tools:** GitHub Copilot, Generative AI Tools — used for debugging assistance, code suggestions, test case generation support, and development productivity improvements
- **Methodologies:** Agile, Scrum

PROFESSIONAL EXPERIENCE

Tata Consultancy Services

March 2022 – May 2026

System Engineer

- Developed and enhanced React.js-based enterprise web applications using HTML, CSS, JavaScript, and React.
- Developed and maintained scalable React.js web applications, improving UI responsiveness and reducing page load time by approximately 30%.
- Designed and implemented reusable React components and component-based architecture, reducing development effort by 25%.
- Built dynamic and responsive user interfaces using React functional components and modern JavaScript(ES6+).
- Utilized React Hooks (useState, useEffect) for state management and lifecycle handling.
- Managed global application state using Redux and Context API for complex data flows.
- Integrated RESTful APIs to enable seamless front-end and back-end communication and real-time data updates.

- Collaborated with backend, QA, and UX teams in Agile sprints to deliver features on schedule.
 - Optimized application performance and ensured high-quality user experience across browsers and devices.
 - Performed cross-browser testing and UI validation using Sauce Labs and AppliTools.
 - Used Git and GitHub for version control, code reviews, and collaborative development.
 - Worked in Agile/Scrum environments, collaborating with cross-functional teams to deliver features on schedule.
 - Leveraged **GitHub Copilot and Generative AI Tools** during development workflows for:
 - Debugging support
 - Code suggestion and refactoring assistance
 - Unit test case generation support
 - Faster issue investigation and productivity improvements
-

PROJECT CONTRIBUTIONS

Enterprise Web Application Development

- **Technologies:** React.js, Redux, JavaScript ES6+, REST APIs, HTML5, CSS3, Git, GitHub, GitHub Copilot, Generative AI Tools
- Contributed to enterprise-level applications with multiple modules and role-based access management.
- Developed responsive dashboards and forms used by internal and external users.
- Built reusable React components and complex forms with validations and controlled components.
- Implemented asynchronous data handling and REST API integrations for seamless data communication.
- Reduced UI defects through proactive issue identification and bug fixing.
- Optimized API calls and minimized redundant component re-renders using React performance techniques.
- Utilized **GitHub Copilot** for code suggestions, boilerplate generation, component scaffolding, and faster implementation of reusable UI logic.
- Leveraged **Generative AI Tools** for debugging support, error investigation, code refactoring ideas, and assistance with unit test case creation using Jest.
- Used AI-assisted workflows to improve development productivity and accelerate issue resolution while maintaining code quality standards.

Advaith Motors Pvt. Ltd
Consultant

October 2020 – December 2020

EDUCATION

Alpha college of Engineering, Bengaluru
Bachelor of Engineering

2016 -2020

ADDITIONAL STRENGTHS

- Strong understanding of modern React development practices.
- Experience translating business requirements into scalable UI solutions.
- Strong problem-solving and debugging skills.
- Focused on application performance, maintainability, and code quality.
- Proactive learner with adaptability to new technologies and tools.
